

Hello,

The Pathologist, in collaboration with Leica Biosystems, would like to invite you to view several intriguing webinars available to stream or download on demand. The first features Dr Muhammad Aslam, Consultant Pathologist and Clinical Lead in the North Wales NHS Surgical Pathology Department, presenting results from the verification phase of the North Wales NHS digital pathology implementation. The second, available in both English and German, features Dr Klaus Wiedorn explaining how laser microdissection enables pathologists to select target cell samples for downstream testing, allowing better stratification of patients, more effective targeted therapy, and better outcomes.

If you would like to view any of these events, simply click on the link to register for the webinar of your choice:

Digital Pathology: Experiences in Implementation from North Wales NHS
